Concerns Investigated Between August 16, 2021 and September 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 46786 Concern Info CP says there is a guy in Bates City who has a Trash Box service, but he takes the trash back to his house and burns it. H thinks the man's first name is Jason and it says "Trash Box" on his truck. His house is located on Old 40 Highway (the south outer road) between Bates City and Odessa. It is located west of a church and there is a temporary asphalt plant a little east of the house. He is building a big gray barn there and right now there is a big pile of trash in his yard. The CP said this is trash that has brought back from the Trash Box customers.								
Comments AP sending LOW for burning regulated waste and improper disposal. No violations sent from SW								
KCRO	8/18/2021	8/18/2021	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	JS		
Concern No. 46842 Concern Info AA Quarries has large volumes of dust leaving the property and has been consistently dusty. They are mining under the road as well. (Referred caller to Dept. of Public Safety for the blasting issues). Caller is frustrated with the volume and constant dust.								
Comments Excessive dust was observed from the drill; however, the dust did not appear to cause a violation. The dust suppression / water system on their drill broke about two hours before the investigation. The drill continued operation in order to finish the hole it had started, then it was shut down. The drill was repaired prior to returning to service.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 46843 Concern Info National Response Center email came to the DNR Spill Line to report of excessive exhaust fumes within the location of a bus stop route. Caller stated that a bus will show up to the location listed and idle for at least an hour daily before continuing on to a route. The exhaust fumes are the reported issue.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.								
KCRO	8/19/2021	8/18/2021	Audubon Materials, LLC	Sugar Creek Jackson	Other	JH		
Concern No. 46972 Concern Info We just found out that Central Plains Cement is building an open pit rock quarry very close to several residences in Sugar Creek and unincorporated Jackson County. They will be using Courtney Atherton Road to run their rock trucks on, which is already in very poor shape. We are opposed to this rock quarry. Do you have any research how they affect the environment our wildlife, etc.? We would like to present this to the City Council of Sugar Creek.								
Comments Facility is still in initial planning stages. ?No violations since there is no facility.								
KCRO	8/19/2021	8/19/2021	Unknown	Kansas City Jackson	Open Burning	MC		
Concern No. 46871 Concern Info Someone at the reported address is burning toxic trash. When the Little Blue Creek overflows the trash is submerged by 3-4 feet of rain water that leads back into the Creek. The burning of all types of trash leaves black thick smoke that smells toxic! Please help out community get this situation under control. The City has been notified as well.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.

KCRO	8/20/2021	8/19/2021	Spire Inc.	Riverside Platte	Other	MC		
Concern No. 46872 Concern Info Concerned party observed a flare going off near the intersection of Hwy 9 and 635 near the Red X in Riverside, MO?								
Comments ?I called the concerned party on August 20, 2021. There was no answer, and the voicemail would not let me leave a message. I called again on August 23, 2021, with the same result. The concerned party later returned my call and we discussed the situation. The flaring event appears to coincide with Spire's notification. The concerned party has not observed any additional flaring events but will contact the Department if additional flaring is observed.								
KCRO	8/23/2021	8/20/2021	ZMDR	Lone Jack Johnson	Odor	JH		
Concern No. 46860 Concern Info We have some pretty strong odors from the ZMDR facility located at 1921 W 50 Highway, Lone Jack. Normally early in the morning, then who knows when during the day. It is 3:20 and was forced back into the house because of their noxious odor. South wind brings it to us.								
Comments No odor violations have been detected off site. Odors have been present but at levels below 2:1 dilution threshold?.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 46899 Concern Info CP states that some people building a house at 21701 E. 203rd Street in Pleasant Hill, MO and he said they are digging a hole and burning shingles in the hole. He said his wife has video of it all. He is also concerned about the water runoff from house and his hay fields.								
Comments Donny Bollinger will be issued a Letter of Warning as he was found to be the responsible individual for burning the shingles at the property site. He has removed the shingles and covered the hole with dirt. He must provide the landfill receipts and Open Burning Acknowledgment Form.								
KCRO	8/25/2021	8/23/2021	Audubon Materials, LLC	Sugar Creek Jackson	Other	JH		
Concern No. 46971 Concern Info ?Central Plains Cement Company of Sugar Creek, Missouri, is attempting to operate an open pit mining operation in an agriculturally-zoned area where mining and quarries are not currently permitted. The City of Sugar Creek's Planning and Zoning Commission is holding a public hearing on August 26, 2021, at 7 p.m. at the Mike Onka Community Hall, 11520 Putnam Street, Sugar Creek, MO 64054. My neighbors and I are very concerned about the strip mine coming in. It's going to be literally butting up to my property line, and it will affect the water table and therefore our well water, the foundations of our houses, and the limestone dust. This quarry will destroy over 800 acres of pristine land inhabited by deer, turkey, and other wildlife, including bald eagles that are seen flying in the area. The proposed blasting operation will occur directly over a large aquifer that feeds the Independence, Missouri, water supply.								
Comments Facility is still in initial planning stages. ?No violations since there is no facility.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	46973	Concern Info	<p>My name is Riane Marsh, and I live on the outskirts of Independence next to the Sugar Creek city line. I'm not exactly sure where the Missouri Department of Conservation can help with my environmental concerns, but I'm writing to you because I'm convinced, from your magazines and the articles I've read in them, you folks are genuinely concerned about preserving our beautiful state.</p> <p>I recently received a notification from the city of Sugar Creek about a strip mine to be put next door to my home. Obviously our immediate community has major concerns. As I have discussed this issue with local friends and family, I have been surprised that only a handful of us received any sort of notification at all. Living literally next door to the property line of the proposed mine, I have seen on the drawings that mining can occur as close as 300 feet from my home and is going to leave a massive 40 foot deep gash through our countryside. I'm on a shallow well. My neighbors and I are concerned about our wells running dry, our foundations cracking and potential sink holes in the area. There are numerous other concerns: noise pollution, flying debris, ruined roads and excessive truck traffic on our one main road, Courtney Atherton Road. The constant dust compromises respiratory health and causes cancer. We see bald eagles in the woods surrounding this area. We have several conservation areas located right next to the mining parcels, like the Liberty Bend Conservation area and the River Bluff Preserve. How can these areas and the animals who reside in them be 'preserved' with daily blasting going on for ten years?</p> <p>As I have discussed this issue with local friends and family, I'm surprised that none of the Independence residents are aware of this proposed quarry. Of course they do not live in Sugar Creek so won't experience as many of the terrible changes this mine would bring, but Independence residents will be affected by the water supply. The quarry will be blasting over the nationally acclaimed aquifer that directly supplies water to Independence as well as surrounding cities. Though we have heard that the Sugar Creek council basically thinks this is a "done deal," we have yet to see any environmental reports assessing the repercussions of this mine on both the environment and the residents.</p>					
Comments	Facility is still in initial planning stages. ?No violations since there is no facility.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 46975 Concern Info Strong odors starting early in the morning from the ZMDR property. 1921 W Highway 50, Lone Jack. They lasted up to 8 p.m. last night the 24th, then started again on the 25th. Truly hoping they can do something to control these odors so we do not have to continue to deal with their stink. We have had a cattle truck full of cattle weaving through the county roads, Cline to Lake Paradise, then south on 1901 road to 800 road, (last time we saw them). Assume they made it to the slaughter plant.								
Comments No odor violations have been detected off site. Odors have been present but at levels below 2:1 dilution threshold?.								
KCRO	9/1/2021	8/31/2021	Jason Weatherman	Bates City Lafayette	Open Burning	JS		
Concern No. 47000 Concern Info Sni Valley reports responding to a large, unauthorized fire. A report and photographs of the incident were provided.?								
Comments A Letter of Warning will be issued to Jason Weatherman for open burning of prohibited items and improper disposal of solid waste.								
KCRO	9/8/2021	9/8/2021	Superior Bowen/City of Kansas City	Kansas City Clay	Fugitive Particulate Matter	MC

NERO	8/20/2021	8/17/2021	Unknown	Moberly Randolph	Open Burning	RD		
Concern No.	46864	Concern Info	?Someone keeps burning wood and maybe other unknown stuff at night. It doesn't always smell like just wood. It smells like fabric and wire with coating burning. This is happening every night and literally causes me headaches, coughing, chest pain and shortness of breath. I have reported this to the police, fire department and city hall and still they keep burning every night. They have even found who is doing it and still allow it to happen. This goes on for hours upon hours. I'm a disabled recovering cancer patient who has multiple medical issues and I live in an apartment that is for disabled people and is low income. We have wall HVAC units so even when we turn on our AC it blows smoke into my apartment and it's making me sick to my stomach.					
Comments	An open burning investigation was conducted and no open burning violations were found.							
NERO	8/19/2021	8/19/2021	Palindromes, Inc.	Columbia Putnam	Asbestos Open Burning Open Dumps: Construction a	SB		
Concern No.	46976	Concern Info	Caller states that five structures located in the 1300 block of East Main in Unionville are scheduled to be demolished. Caller is concerned that the structures have not been properly inspected for asbestos or demolition notification provided. Caller states the structure at 1316 Main was used as a nursing home/care facility in the 70's . Caller states that the structure at 1312 E Main has been lifted off the foundation to be moved and that the work is being performed by Amish contractors. Caller is concerned that asbestos/demolition waste from the interior is going to be burned and buried somewhere in the county. Caller states kitchen floor tile in this structure contains asbestos. Caller is also concerned about the disposal of lead based paint.					
Comments	No violation at the time of investigation. Gave guidance on asbestos inspection and notification requirements to the owner and to the individual preparing to move a house from the property.

Concern No. 46905 Concern Info ?By email, the following two reports were filed on Monday, 8/23. It is reported that on Sunday, 8/22, there was a trash odor at the concerned party's house. The odors were rated at a 4 on a scale from 1 to 10. On Monday, 8/23, odors were really bad at 4:40 p.m.								
Comments No on-site investigation given that the last several on-site investigations have found no violations. Reports are being grouped and will be investigated time when odors are predicted to be strongest.								
NERO	8/30/2021	8/23/2021	Boone Quarries East	Columbia Boone	Fugitive Particulate Matter	RD		
Concern No. 47024 Concern Info The dust is not controlled by Boone Quarries from the rock quarry. Creasy Springs Road in front of the rock quarry has turned white from the dust. Therefore, the dust on the road gets into our cars which cause harm to our breathing. Also, the dust keeps our cars dirty especially when it rains. The rock quarry dust creates breathing problems with the citizens of Columbia using the Bear Creek Trail, which is located by the quarry. I can't believe a city walking trail is located right by the quarry. Homes are located close to the quarry and getting dust on the homes. I think the dust is getting inside of my home. When you drive down Creasy Springs Road, sometimes you can see dust above the street. The dust is leaving the quarry going into the trail, Creasy Springs Road and nearby homes. This is a serious situation.								
Comments Dust was found on the property, but due to weather conditions was not leaving the property.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 47026 Concern Info Concern party states, Ther odor started about a week ago in the evenings: the terrible smell and sounds of construction works. My allergy started 3 days ago, and tonight I'm having an asthma attack. Feels like some construction works nearby as I also hear some sounds in parallel with the odor. On August 17 at 9:00 p.m. the odor was a strong petrochemical smell								
Comments A slight asphalt smell was present from road construction, no violations were found.								
NERO	8/30/2021	8/25/2021	?	Moberly Randolph	Open Burning	RD		
Concern No. 47033 Concern Info Caller reports that someone in his neighborhood is burning wood and wire by night. Caller believes it may be the property owner or resident located at 407 Bertley in Moberly. It is making the party sick from the smoke. Has been investigated multiple times by the fire department and police department and nothing has been found other than wood being burned.								
Comments I drove around several blocks around 220 Taylor Street, Apt. 215 and the concern location of 407 Bertley, Moberly, MO. I drove around the address of Bertley several times and found no evidence of open burning violations.								
NERO	8/31/2021	8/26/2021	Clyde Potter	Baring	Open Burning	SB		
Concern No. 47009 Concern Info Clyde & Virginia Potter burnt a sofa after dark (still flames at 10 pm) on a vacant lot they own across the street from their home. This was within 30 feet of a residence - who does not have ac and could not open their windows due to smell, smok & fumes. How this was discovered - neighbors out of concern went to see what was on fire since nobody was around the fi Pictures were taken the following morning 8/26/2021 - part of a wooden frame and sofa springs are all that is left. This is n the first time they have burnt questionable things after dark.								
Comments In violation of open burning regulation. Issue an Unsatisfactory Findings Letter with a Response Required within 30 days.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 47005 Concern Info SP:30359 ?Brent King called in a concern about Potosi Charcoal opening an unpermitted bagging line. Mr. King informed me his is the Judicial Receiver appointed by the court and he is giving permission for us to access the property to investigate this concern. He asked that when someone is assigned this concern to please give him a call at 309-368-0083.								
Comments ?I began this investigation by reviewing the permit for Potosi Charcoal. This air construction permit (see Project Number 2018-04-046 or Permit Number 102018-003) does specifically authorize the construction of a charcoal bagging system at this site. I telephoned Mr. Brent King on August 25, 2021, and I explained how the air construction permitting process works and that it was not a violation for a bagging system to be constructed at the Potosi Charcoal location. I also gave Mr. King an explanation of how to review Potosi Charcoal's air construction permit online. Brent King informed me that Potosi Charcoal has been shut down and will soon be sold by the Bank that now owns the business. Mr. King asked that I not pursue the matter further; but that he would follow up and let me know if there are any additional developments or questions.

Concern No. 46994 Concern Info SP:30399 ?Strong odor coming from Timber Ridge Landfill that can be smelled from Yellow Dog Road. The smell is only noticeable a night and first thing in the morning.								
Comments After speaking with the concerned party by phone following their submission of the concern? on August 19, 2021. I visited the site of concern, Timber Ridge Landfill, on August 25, 2021 to check for odors. A loop was made down Highway 47 to Highway H, across Highway H to Highway WW and up Highway WW. No landfill odors were detected along the route or at the following stops. 1) Intersection of Yellow Dog Rd and Highway 47. Cattle/Horses and cut grass odor at this location. 2) Intersection of Highway H and Highway 47 near Richwoods. 3) Across the road (Highway H) from the entrance to Timber Ridge. 4) The intersection of Still Creek Pass and State Road WW. Wind direction at the time of investigation according to NOAA historical data was from the SW. Spoke to Kevin Gentry from Timber Ridge. No known issues have occurred during the week of August 19, 2021 that would have increased odors. Voluntary third party odor surveys being conducted by Timber Ridge have not indicated any issues for a couple of months.

<p>Concern No. 47004 Concern Info SP:30400 ?The RP is going around the community and picking up trash for people, hauling it to their property, and burning it on the property.</p> <p>Comments ?At the time of the investigation no open burning was noted. There was an open burn area near the house; but little evidence of what had been open burned. The Property Owner, Lisa Wilson, stated that the materials being burned were generated on site from the previous owner. Ms. Wilson stated that no trash service business is in operation at this address. She further stated that she has trash service and has only been using open burning in an effort to clean up the property, which was previously piled up with trash.</p>								
SERO	8/25/2021	8/24/2021	Jarrod Keen	Bonne Terre St. Francois	Hazardous Waste Generator: Odor Scrap Tire Dump	JD		
<p>Concern No. 46992 Concern Info SP:30449 This racetrack operates every weekend and late into the night. The noise is terribly loud (decibels measured by neighbor), the smell of burning tires, diesel fuel, oil and gasoline is thick in the air at our home as well as surrounding homes. When there are races we cannot go outside due to the noise and odors. We worry the creek behind our house may eventually have fuel leach into it (we are approx a half mile away). We hope the owner would be required to 1) install fencing/barriers to mitigate the noise; 2) be responsible for proper monitoring and disposal of fuel, oil or any hazardous waste on his property; and 3) be responsible for proper disposal of tires, I am not including my name because I fear retribution.</p> <p>Comments ?Bonne Terre Drag Strip is not a hazardous waste generator, all fuel and tires are brought to the drag strip by the competitors and all waste is taken with them for disposal after the event. With properly operating vehicles spent fuel odors will not be present utilizing a nasal ranger (7:1 dilution ratio).</p>

Concern No. 47146 **Concern Info** SP:30550
?CP states the landfill has a very strong smell. CP states this morning their nose is burning and the smell is very strong.

Comments There is not enough specific information to work this complaint.

?The Concerned Party (CP) was anonymous, so that there is no opportunity to gather more information with from the CP in regards to the specifics of this environmental concern.

A recent investigation of odor from Timber Ridge Landfill (Concern #30399) had the following result:

No landfill odors were detected along the route or at the following stops.

- 1) Intersection of Yellow Dog Rd and Highway 47. Cattle/Horses and cut grass odor at this location.
- 2) Intersection of Highway H and Highway 47 near Richwoods.
- 3) Across the road (Highway H) from the entrance to Timber Ridge.
- 4) The intersection of Still Creek Pass and State Road WW.

Wind direction at the time of investigation according to NOAA historical data was from the SW.

Spoke to Kevin Gentry from Timber Ridge. No known issues have occurred that would have increased odors. Voluntary third party odor surveys being conducted by Timber Ridge have not indicated any issues for a couple of months.

No odor violations were observed at the time of the investigation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 46962 Concern Info ???Caller states that the automotive body shop behind him has a paint booth, and whenever they are painting, fumes come from the back of the facility into his yard. Carries a strong odor and has killed vegetation at the back of his property.								
Comments ?I visited the site on 8/19/2021 and conducted a hazardous waste compliance evaluation inspection (CEI) as part of the investigation. I observed the facility's single paint booth, located on the north side of the property. I determined that the paint booth met all requirements in order to be exempt from requiring an air construction permit under 10 CSR 10-6.061 3(A)2.Z. The paint booth was completely enclosed, had a sufficient filtration system, and vented through a stack on the roof. It was also over 80 feet from the closest property (the concerned party address). The facility changes its filters every week. The facility was also managing its hazardous waste properly for the most part (see inspection report for more details). I did not observe any sign of paint accumulating on the back fence behind the building, or any vegetation in the area. The fence behind the building was white, and would likely show even small amounts of paint if it was escaping from the building. I recommended that the owner of the facility stand outside and watch the next time they are painting, and maybe they could identify if there was an issue.								
After inspecting the facility, I visited the concerned party's address. I discussed my findings with the concerned party and observed the back of their property, which borders Elite Custom and Collision. The concerned party said that the other day, they observed visible emissions from the stack, and smelled strong paint odors. As the facility was not painting at the time of the investigation, I did not observe this. I recommended that the concerned party discuss the issues with the owner and find a reasonable solution. I explained that I did not observe any issues with the paint booth and did not observe any odors, emissions, or signs of paint migrating from the property.

<p>Concern No. 47038 Concern Info Anonymous caller reported that tires, wires, plastic, and trees from tree trimming services were being burned at all hours a 464 Red School Road in West Alton. Property is a farm with an old barn, but there has been a camper at the property for a while. Owner Adam Bridges lives at 155 Richard Drive in West Alton. The caller suspects illegal drug activity and reports the owners are violent. This has been going on for about a year. Caller stated that the police and fire department have been called multiple times and know about the situation.</p> <p>Comments ?Referred to St. Charles County Dept. of Community Health and Environment, Div. of Environmental Services, for enforcement of solid waste disposal ordinance. Communicated that owners are violent and suspected of illegal drug activity.</p>								
SLRO	9/15/2021	9/10/2021	Unknown	Troy Lincoln	Open Burning	LZ		
<p>Concern No. 47198 Concern Info ?Anonymous caller indicates that someone is burning a mobile home in small amounts in their front yard. The caller states that the burning has been steady over a number of months. The caller stated he did not know who was doing the burning. The caller gave an address of 96 Hardy Rd. in Troy, then said it was at the intersection of Hardy Rd and Walker Rd. When asked if Fire Department had been contacted, replied that the Fire Department told them to contact DNR. This was all the information that the caller gave.</p> <p>Comments I drove about 3 miles west on Hardy Road (from the intersection of Ridge Road and Hardy Road) looking for any open burning activities in the area at the intersection of Walker and Hardy and located the house (alleged source of concern). The area is heavily wooded surrounded by farms. There are few houses, far from each other, most of them on the right side of Hardy Road. There was no open burning on either side of the road that I was able to see at the time of my visit. However, at the back of the house located at the intersection of Hardy and Walker, I observed a pile of previously open burned what looks like to be household materials (see photo 1). There was no one in the neighborhood that I was able to talk to regarding open burning activities in the area.</p>

Concern No. 46759 Concern Info The location of the property of concern is 342 Wright Street in Stotts City. Herbert Tune has a junk yard where he is burning trash, including electronics. Any metal remains, are being loaded on a trailer and hauled off for scrap. The smoke is black and this is the second day of burning.								
As a neighbor, our family is having to stay in our home as the air is hard to breathe in and smells toxic.								
We have had continuing ongoing issues with this man and the group of people that he runs around with who refuse to quit burning toxic items.								
He was burning on the city right of way across the street from the tow yard. There is also concern about the piles of trash that is left on the property and that he is operating a business with no running water or sewer. As a citizen, I am concerned about the oil, gas, other miscellaneous vehicle fluids, the trash, and now the burning that is leaching into our roads, and air.								
The property is the name of Rosenna Joiner (deceased) but the daughter (Stephanie Foster) lives across the street. However, Herbert Tune is the business owner using the property. He has been told on numerous occasions to stop burning.

Concern No. 46939 **Concern Info** email from WPCP:

I received a call from a concerned citizen who wanted to report a questionable looking burning/dumping/demolition site in Morgan county. He said he was calling because burn piles and scrap were probably less than 20 feet from the stream bank and that didn't seem right to him. I don't know what our rules are on things like this, so I said I'd pass his concern on to someone who might know better to check it out.

The site is south of Versailles, just south of Gravois Creek, at the junction of 5 and highway J. He mentioned a mobile home site, so I'm inclined to think his concern is with the lot adjacent to Brushy Creek (below). The concerned citizen's name was Kevin, he apparently used to work in state parks and said he'd be happy to provide more information. His number is 573-821-1774.

<p>Concern No. 47101 Concern Info When I was environmental manager at this site years ago, I worked very hard to eliminate dusting events from the mills at this site. I did daily surveys and ensured every day that the opacity checks were completed. Since leaving, every time I drive by the plant, every single building is dusting out the stacks. If it was once in a while it could be start-up or malfunction. But, over 2 years it has been every time I pass by the plant. It makes me very upset that the current managers are not continuing the best practices. Also if they are dusting this often they must not be following reporting guidance for their daily Title V paperwork. I would not report this but as I said, I worked hard to clean-up this facility and it is ongoing regular issue (2 years). I realize as a past employee it may seem as I am simply a disgruntled person but I am</p> <p>(form cut off any additional language from online submittal)?</p> <p>Comments See SharePoint #30641</p>

Concern No. 47149 Concern Info Received a phone call from the Stone County FPD, Keith. He stated he received a call from Develle Stolls (sp?) out of Reeds Spring Junction. Stolls claims his neighbor is constantly burning wiring, copper wires, etc. to take off the insulation. Stolls stated the neighbor hears the fire dept. coming and hides his burning by the time they get there. Keith stated they have not been there to put out a fire so they don't have any reports on this site.
